DETAILED ACTION

1. The Preliminary Amendment filed on March 22, 2004 has been entered.
2. The information disclosure statement (IDS) submitted on June 24, 2004 is considered by the examiner.
3. The following is an examiner's statement of reasons for allowance:

Claims 1-13 recite, inter alia, an integrated circuit having an internal circuit and an external terminal for communicating between the internal circuit and circuitry external to the integrated circuit, the external terminal for receiving a supply voltage from the circuitry external to the integrated circuit, comprising a device for isolating the internal circuit from the external terminal, the device having control circuitry for sensing a short in the internal circuit and outputting a control signal in response thereto, the control circuitry including circuitry for sensing current drawn by the internal circuit exceeding a predetermined threshold and for outputting the control signal in response thereto, the control circuitry including a first transistor having a source coupled to a supply terminal, a gate coupled to an output terminal, and a drain coupled to a control signal terminal; a first resistive device coupled between the supply terminal and the output terminal; a second resistive device coupled between the control signal terminal and a reference voltage bond pad; a second transistor having a source coupled to the supply terminal, a gate, and a drain coupled to the control signal terminal; and an inverter coupled between the control signal terminal and the gate of the second transistor; and circuitry for sensing the voltage applied to the internal circuit.
